DETAILED ACTION

1. Claims 1-15 and newly added claims 17-22 are pending.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6-13-03 has been entered.
3. Claims 1-11 stand withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b) as being drawn to non-elected inventions.
4. Claims 12-15 and newly added claims 17-22 are under consideration in the instant application.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 12-15 and 17-22 stand rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a diagnostic method for detecting ulcerative colitis and inflammatory bowel disease in the colon comprising detecting CEP-hTM5 complexes with antibodies against CEP and hTM5, does not reasonably provide enablement for a diagnostic method for detecting inflammatory bowel disease or diseases associated with inflammatory bowel disease comprising detecting any CEP-hTM complexes in any tissue by any method. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims.

Applicant's arguments filed 6-13-03 have been fully considered but are not found persuasive. Applicant argues they have amended the claims as suggested by the Examiner.

However, the claims still read upon detecting a protein CEP not known to be in any other tissue except colon and of the htm proteins, only the htm5 protein is recognized to be involved in IBD. Lastly, applicant provides no guidance as to any mechanism to detect the complexes besides antibodies.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick Nolan whose telephone number is (703) 305-1987. The examiner can normally be reached on Monday through Thursday from 9:30 am to 4:30 pm.
7. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Christina Chan, can be reached at (703) 305-3973. Any inquiry of a general nature relating to the status of this application or proceeding should be directed to the Group receptionist, whose telephone number is (703) 308-0196.
